Artificial Organs Proceedings of a seminar on the clinical applications of membrane oxygenators and sorbent-based systems in kidney and liver failure and drug overdose, held at the University of Strathclyde, Glasgow, in August, 1976

### **Artificial Organs | SpringerLink**

The primary purpose of this paper is to review the types of devices that are currently used in the human body as artificial organs and prosthetic devices. By definition, an organ is a specialized structure (e.g. heart, kidney, limb, leaf, flower) in an animal or a plant that can perform some specialized function.
