Color atlas of Cytology, Histology and Microscopic Anatomy

A Guide to Microscopic Structure of Cells, Tissues and Organs Robert L. Sorenson Sample. ii This atlas is a series of photographs ranging from low to high magnifications of the individual tissue specimens. The low magnification images should be used for orientation, while the higher magnification images show details of cells, tissues, and organs. Although every effort has been made to ...

Color Atlas of Cytology, Histology and Microscopic Anatomy

This timeless pocket atlas is the ideal visual companion to histology and cytology textbooks. First published in 1950 and translated into eight languages, Kuehnel's Pocket Atlas of Cytology, Histology and Microscopic Anatomy is a proven classic.

Color Atlas of Cytology, Histology and Microscopic Anatomy

The Zebrafish: Atlas of Macroscopic and Microscopic Anatomy is an excellent resource for zebrafish researchers examining mutant adults for morphological or tissue-level abnormalities. The text is geared toward scientists interested in studying human disease, and the introduction stresses the value of zebrafish as a model organism for studying oncogenesis and developmental disorders, from their low cost to early expression of phenotype.

The Zebrafish: Atlas of Macroscopic and Microscopic Anatomy

The information contained in Anatomy Atlases is not a substitute for the medical care and advice of your physician. There may be variations in treatment that your physician may recommend based on individual facts and circumstances.
