Birth Defects In South-east Asia A Public Health Challenge

Some birth defects do not follow a single gene or chromosomal abnormality pattern. They may be due to several problems, or a combined effect of genes and the environment. It is difficult to predict inheritance of abnormalities caused by multiple factors. Examples include heart defects, cleft lip or cleft palate, and neural tube defects (defects in the spine or brain).

Types of Genetic Diseases - stanfordchildrens.org

The following is a list of genetic disorders and if known, type of mutation and the chromosome involved. Although the parlance "disease-causing gene" is common, it is the occurrence of an abnormality in these genes that causes the disease.
